Prof. Helen H. Savaki
Dep. of Basic Sciences
Faculty of Medicine
University of Crete
71003 Iraklion
Crete
Greece

Dear Prof. Savaki,

It was a great experience for me having the opportunity to lecture in your Neuroscience Program at the Faculty of Medicine of the University of Crete. I was profoundly impressed by the quality of the research carried out in the Department of Basic Sciences and the topics that you and colleagues teach to the graduate students in your University.

Over the last 25 years or so, I have lectured in all major universities of Europe, United States, Asia and here in Mexico, and can say that your program has the higher standards for teaching and training young students in Neuroscience. In addition, I was profoundly impressed by the quality of the young students that are trained in your Neuroscience Program. They are highly motivated and must say that all of your students are comparable to the best international programs in neuroscience that I know.

Congratulations for such an important effort for creating a Neuroscience Program in Greece with the higher international standards in science. I really hope to have another chance to participate in your Neuroscience Program.

Sincerely yours,

A handwritten signature in black ink, reading "Ranulfo Romo D.", is positioned below the "Sincerely yours," text.
